

Standards Matrix: Terrific Tiles!

TASK: Terrific Tiles! Grades 3 – 5	H = S =	U = C =	H = S =	U = C =	H = S =	U = C =	H = S =	U = C =	H = S =	U = C =
STRAND: Geometry, Spatial Sense and Measurement										
GRADE 2										
Explains how geometry helps describe the physical world.										
Examines the concept of area, using common geometric shapes.										
Explores the use of standard units and explains the need for using standard units.										
GRADE 3										
Measures the areas of common quadrilaterals and analyzes the relationship between multiplication arrays and area.										
Represents and solves problems using geometric models.										
Explains geometry as a means of describing the physical world with particular attention to combining, subdividing, and changing shapes.										
Uses knowledge of geometry to develop spatial visual skills.
