# Sweet Sale

Claire loved to stop at the candy store once a week to buy herself a treat.

There was a new sign above the candy counter. The sign said that when you buy your first piece of candy it will cost 5 cents, but each piece of candy after that would cost only 3 cents.

Claire thought this was an excellent time to spend the twenty cents in her pocket.

How many pieces of candy did Claire have after giving the clerk her 20 cents?
